VOLVO FMX HOOKLOADER

In stock and with immediate availability.

Volvo FMX is a tough construction truck, loaded with technology that makes the most demanding assignments easier. Generous ground clearance and axles to carry heavy loads, this truck is made to take you where others can't, whether there's a road or not.

Boughton's now ubiquitous hook loader product remains the UK market's equipment of choice. Introduced in 1973, it is still recognised for its simplicity of design and operation, rugged strength, durability, reliability, ease of maintenance and longevity.

Vertical Exhaust

Factory Beacons

X - High Chassis

The Volvo FMX with the day cab offers a safe, comfortable and ergonomic driver environment.

The cab length is optimised to maximise the length of the load carrier.

Air Suspended and Heated Drivers Seat.

12-speed I-Shift Transmission

In-Cab Body Controls

- R&M Offers from £99.00 per month
- 99% MOT Pass Rate
- Night-time and weekend availability accross 6 sites
- Volvo IRTEC trained technicians
- Frontline 24/7 Mobile Support

A robust exterior made to stand tough use. An iconic heavy-duty bumper, made from 3 mm high-grade steel, there to shield your front from dents and broken headlights in any terrain. Axles that carry your loads and provide traction.

Key Hook Loader features include:

- Heavy duty deep section main frame for optimum strength and rigidity
- Simple, straightforward and logical hydraulic system
- In-cab mounted, electric/pneumatic over hydraulic control box
- Secure, robust, low maintenance body mounting points
- Models to suit CHEM standard 'B' Spec or Universal 'C' Spec, for applications including modified cable or Dinosaur containers
- Three point, container locking system comprising rear 'Comblock' (clamp and lock) container locking and rear facing secondary container locks
- High strength steel lifting hook, with the option of an auto hook safety pin (fitted as standard on 'C' Spec)
- Rear roller or axle stabiliser jack options
- Heavy duty rear light guards
- Fully interlocked for optimum safety
- Wide range of options including towing hitch, onboard weighing, camera and safety systems

Key Kwikcova features include:

- Choice of configurations to suit bin applications
- Telescopic arms and telescopic mast ensure that sheet is laid, not dragged over the load, prolonging the operational life of the sheet
- Loaded container can be fully sheeted within one minute
- Easy to use elasticated side restraint system ensures a safe and secure load
- Boughton patented side arm operation ensures compliance with UK C&U maximum vehicle width regulations
- Side arm technology permits safe and efficient handling of containers with side body bulge
